Waikīkī Beach Maintenance Project Receives National Award For Best Restored Beach

The Waikīkī Beach Maintenance Project, completed a little more than a year ago, is one of four beach restoration projects honored by the American Shore and Beach Preservation Association (ASBPA) recognized as a Best Restored Beach. The goal of ASBPA's annual best restored beaches award is to acknowledge community beach restoration projects around the United States which increase a shoreline's resiliency, the beach's ability to mitigate storm damage and flooding from severe storms, and naturally allow the beach to adjust to short-term sea level rise while remaining an important part of the nearshore ecosystem. ASBPA created the annual award list to highlight the value of restored beaches.

The Waikiki Beach Maintenance Project carried out along the shoreline of Royal Hawaiian Beach was completed in May, 2020. The project resulted in the placement of 21,000 cubic yards of sand roughly doubling the beach width and was funded through a public/private partnership with the State of Hawai'i, Department of Land and Natural Resources and the Waikiki Beach Special Improvement District Association. This is the second time in a decade Waikīkī has had a sand replenishment project.

The project is another example of the successful public-private partnership between the DLNR Office of Conservation and Coastal Lands (OCCL) who managed the project and the Waikīkī Beach Special Improvement District Association (WBSIDA) which put \$1 million toward the ~\$3.5 million cost. The project contractors, Kiewit Infrastructure Group and American Marine were instrumental in the success of the project working through poor weather and high surf conditions in order to complete the job ahead of schedule. The project is part of a planned (5-10 year) maintenance of Waikiki Beach using a “sand recycling” concept utilizing offshore sand eroded from the beach and placing back on the beach.

Dolan Eversole of the University of Hawai'i Sea Grant and WBSIDA described the project in terms of the long-term adaption strategy for the region as “In the longer-term, planning for resilience for Waikīkī includes taking into account a lot of different variables including projections for sea-level rise, beach erosion, flooding and anticipated beach and coastal land use priorities. It is important we view the marine ecosystem, the coral reefs and beaches as a natural buffer to coastal hazards that require protection and regular maintenance just like other man-made protections like seawalls and shoreline structures.”

Rick Egged, President of the WBSIDA added, “After one year since the beach maintenance project was completed we are delighted with the project results, the beach has not only remained stable but increased in width in some critical areas of Waikīkī Beach. We are delighted to see national recognition of this important beach improvement project.”

Restoration projects are judged by the ASBPA on their economic and ecological benefits, its short- and long-term success, and the challenges each community overcame during the project. In addition to the Waikīkī Beach Maintenance Project other beaches awarded are, Duxbury Beach Dune Restoration Project, MA; Ocean Isle Beach Shoreline Protection Project, NC; and Sodus Point Beach Project, NY.

Covering more than 30,000 square feet, Beyond Monet is the largest immersive experience in the country, offering guests ample room to safely enjoy the exhibit. WAIKĪKĪ IMPROVEMENT ASSOCIATION

We are a cross-section of business, government and the community; our members care about the future of this special place - Waikīkī.

For more than 40 years, the Waikiki Improvement Association has remained true to its objective: to improve, enrich and beautify Waikīkī for the benefit of residents and visitors alike and to promote conditions conducive to the economic and cultural good and for the betterment of the entire community.

HAWAIIAN DIACRITICAL MARKS

Waikīkī Improvement Association recognizes the use of diacritical marks (i.e., glottal stop (ʻ), macron (ā) in place names of Hawaiʻi, such as Waikīkī and Kalākaua Avenue and will include them whenever possible. We also respect the individual use (or not) of these markings for names of organizations and businesses.

There will also be times when we may not have a chance to add or change the markings in all of the articles submitted and when that happens, e kala mai.
